Colombia | +57 315 569 5728 | sergio.junca@gmail.com | <https://www.linkedin.com/in/sjunca/>

Senior Mobile Engineer (React Native) with 10+ years of experience designing, building, and shipping production-grade mobile applications across fintech, logistics, healthcare, and gaming products. Specialized in React Native and modern JavaScript/TypeScript ecosystems with strong experience in cross-platform architecture, CI/CD pipelines, performance optimization, and scalable component systems. Experienced collaborating with cross-functional teams, mentoring engineers, and delivering mobile applications deployed to both Apple App Store and Google Play.

CORE SKILLS

- Languages: JavaScript (ES6+), TypeScript
- Mobile: React Native, Cross-Platform Architecture, iOS, Android
- Frontend: React, HTML5, CSS3, SASS, Responsive Design
- State Management: Redux, MobX
- APIs: REST APIs, GraphQL, Token Authentication
- CI/CD: CircleCI, Jenkins, Firebase App Distribution, TestFlight, Google Play Console
- Tools: Git, Storybook, Figma, Nexus, Confluence
- Practices: Agile/Scrum, Code Reviews, Performance Optimization, Accessibility

PROFESSIONAL EXPERIENCE

LeoVegas Group — Senior Mobile Developer (Nov 2024 – Present)

- Lead development of cross-platform mobile features using React Native for a consumer mobile product released on iOS and Android.
- Design scalable mobile architecture and reusable components supporting ongoing feature development.
- Collaborate with product managers, designers, and backend engineers to deliver production-ready features.
- Conduct code reviews and maintain engineering standards across the mobile codebase.
- Improve mobile performance and application stability through code optimization and debugging.
- Implemented CI/CD automation using CircleCI to streamline mobile build and deployment workflows.

Baxus — Senior Mobile Developer (Contract) (Jun 2024 – Nov 2024)

- Developed cross-platform mobile applications for both iOS and Android using React Native.
- Integrated REST and GraphQL APIs to support real-time application functionality.
- Implemented scalable state management using Redux and MobX.
- Delivered production-ready UI components in collaboration with product and design teams.

KPN — Senior Mobile Developer / Team Lead (Contract) (Jun 2023 – Feb 2024)

- Led engineering work to improve accessibility support across both mobile platforms.
- Translated product epics into actionable development tasks for mobile engineers.
- Coordinated work across product, QA, and engineering stakeholders.

- Supported testing and release cycles to maintain stable production deployments.

Nisum (Client: Bank of Chile) — Senior Frontend Mobile Developer (Mar 2022 – Jun 2023)

- Built scalable React Native interfaces using internal design systems and component libraries.
- Integrated secure REST APIs with token-based authentication.
- Mentored junior and mid-level engineers during a structured 6-month internal training initiative.
- Delivered new features for a banking loyalty mobile application.

Lean Solutions Group (Client: Project44) — Senior Mobile Developer (Jan 2021 – Apr 2022)

- Developed logistics mobile features including geolocation, maps, and device permission management.
- Implemented feature flag systems supporting multiple deployment environments.
- Managed mobile testing and release distribution using Firebase App Distribution, TestFlight, and Google Play Console.
- Produced engineering documentation and UML diagrams supporting development planning.

WeKnow (Client: Northwell Health) — Frontend Mobile Developer (Jul 2018 – May 2020)

- Developed React-based frontend components used in healthcare web applications.
- Led sprint planning activities and task breakdown for frontend development work.
- Implemented unit tests for key application features including e-commerce components.
- Improved application security through implementation of frontend tokenization mechanisms.

EARLY CAREER

Frontend and Full-Stack developer roles (2014 – 2017) building responsive web applications, WordPress platforms, and early progressive web applications using AngularJS, Bootstrap, jQuery, SQL, JavaScript, HTML, and CSS.

EDUCATION

Autonomous University of Bucaramanga — Bachelor's Degree, Computer Science and Engineering

ADDITIONAL EXPERIENCE

- Technical mentor for junior developers.
- University speaker promoting web and mobile development technologies.
- Experience supporting recruiting and onboarding of engineering talent.
